BIANCO NXT accessories

PRODUCT DATA SHEET

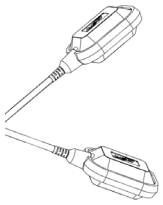
P/B PUMP FLOAT SWITCH

WHI-PIGGYBACKFLOAT-V5 – 802669

PRODUCT DETAILS

A ‘piggyback’ or ‘interrupter’ type float can be fitted quickly, and without the need of an electrician, to provide additional control and protection for 230V single-phase pumps.

The float controls the supply of voltage to the pump.



BENEFITS

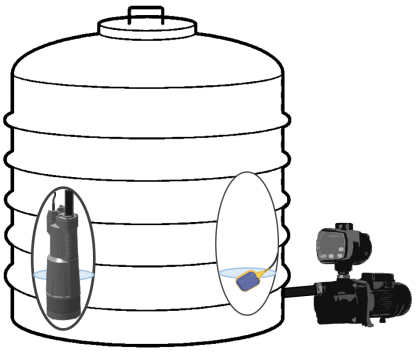
- Improved pump control

FEATURES

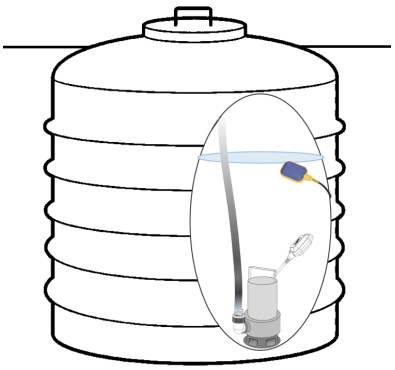
- Fast, easy installation – no electrician required
- Pre-fitted counterweight
- 15m ‘plug and play’ IP68 waterproof cable
- Certificate of Approval SAA 190723-EA

BIANCO NXT 1 YEAR WARRANTY

POSSIBLE USES



To prevent a pump from starting below a certain water level. This option is preferable to relying on inbuilt dry-run protections.



To delay the water level at which a submersible pump fitted with a float begins to operate.
