WHEN A BETTER TOOL IS MADE...

MARSHALLTOWN WILL MAKE IT!

In 1890, Jesse and Lester Williams started a small machine shop on East Church Street, repairing bicycles and automobiles, and fulfilling occasional tool orders for local contractors.

One local plasterer asked that they customise some tools for him. The customer was pleased with the improved product and more requests trickled in. The Williams brothers made a few more trowels and put them on the market. Word travelled fast and they began receiving orders from outside of the state.

The men needed more space and they moved in 1902. They built a two-story machine shop, blacksmith shop and automobile shop, as well as a boiler and engine room and office. They began specializing in trowels and referred to that part of business as "Marshalltown Trowel Works."

Marshalltown Trowel changed its name in 2003. The company had long since become more than just a "trowel" supplier and now offers over 7,000 products for professionals and do-it-yourselfers in asphalt, brick, concrete, drywall/plasterboard, tile and more. To its customers and others in the industry, the company is known for the best tools and it is known by one name – MARSHALLTOWN.

The Williams brothers began over 130 years ago and MARSHALLTOWN is now one of the largest tool manufacturers in the world. MARSHALLTOWN continues making major improvements to its infrastructure, manufacturing, and distribution processes to ensure that it can continue to serve its customers well for the next 130 years.

- 1890**
Jesse and Lester Williams started a small machine shop. Word of their customised tools spread rapidly.
- 1902**
Moved to a larger space to keep up with increasing orders.
- 1905**
Officially named "Marshalltown Trowel Company."
- 1909**
Marshalltown embarked on its first large marketing campaign across US & Canada.
- 1918**
Marshalltown sent 18,000 trowels overseas to the US Army during the World Wars. Impressed by the tool quality, unprecedented European orders flooded in.
- 1930**
At this time, Marshalltown was the largest exclusive manufacturer of masonry tools in the world.
- 1982**
Marshalltown formed its subsidiary, "Marshalltown Tools," and began production in its new facility in Fayetteville, AR.
- 1990's**
Marshalltown was the first company to put a soft-grip handle on a construction tool, thereby revolutionising the hand tool industry.
- 2003**
The company had long since grown to be more than just a "trowel" supplier. To reflect that, Marshalltown Trowel Company changed its name to MARSHALLTOWN.
- 2018**
MARSHALLTOWN acquired Spin Screed®, the world's first lightweight power roller screed, continuing to help contractors produce flatter, more durable concrete surfaces.
- 2019**
MARSHALLTOWN continued to grow. The new building addition in Marshalltown, IA, was completed.
- 2019**
MARSHALLTOWN expanded its line of flooring, tiling, siding, and insulation shears and tools by acquiring Bullet Tools.
- 2021 and beyond...**
MARSHALLTOWN is committed to making improvements to its infrastructure, manufacturing, and distribution processes to ensure that it can continue to serve its customers well into the future.

LEATHER

Double the amount of leather rings as the competition

Handle design allows for a bumper and finger guard

Burnished finish gives an authentic, natural leather feel

Aluminium ring locks the leather rings in place and makes for a smooth transition between the leather rings and the bumper

Handle base will not shrink or swell, ensuring a tight fit between the handle and the leather rings

DURASOFT

In the early 1990's, Marshalltown was the first company to put a soft grip on a construction tool

All of Marshalltown's DuraSoft® handles feature a unique black plastic core for added strength

The "brick red" outer soft-grip material provides the ultimate in user comfort

Provides a soft feel, reduces fatigue and offers excellent durability

DURACORK

NEW

The DuraCork™ handle is a soft grip handle made of a composite overmold material

The composite mixture includes fine pieces of cork. This results in the handle being textured, as well as tacky to provide a better grip

Provides a better grip than other handles on the market

SOFTGRIP

The SoftGrip handle provides increased comfort and ergonomics over a standard plastic or wood handle

Durable construction

Designed for repeated use but priced for the Do-It-Yourselfer

WOOD HANDLE

Traditional hardwood handle

Timber provides a classic natural finish to the handle

Lightweight for comfortable use

PLASTIC

Patented back in 1930, the plastic handle was the first of its kind that was moulded on to the brick trowel to prevent twisting

Does not swell

PHILADELPHIA PATTERN

Philadelphia pattern trowels are better suited for laying block because they allow for more mortar to be placed on the blade.

LONDON PATTERN

London pattern trowels are the standard blade type for laying brick.

WIDE LONDON PATTERN

Wide London pattern trowels can be used for laying brick or block. The rounded heel places the mortar further forward on the blade than the Philadelphia pattern trowels.

When you purchase a MARSHALLTOWN® Brick Trowel there are no surprises

No other brick trowel manufacturer can match MARSHALLTOWN's commitment to providing consistent quality.

It all starts with our steel; a proprietary formula developed for the unique requirements of a brick trowel. We take our steel and carefully forge and heat treat it into brick trowels by using state of the art equipment that we have developed and refined into a unique factory dedicated to making the best brick trowels in the world.

Our handle rise is always set at precisely the same angle. We hold extremely tight tolerances on blade thickness to maintain consistent flexibility and strength on every trowel we sell.

We precisely maintain blade chemistry and hardness to guarantee that your trowel will perform better than expected. This all means that every single MARSHALLTOWN brick trowel we make is great. Most manufacturers can make a few good brick trowels, and maybe even one or two great ones. But they also make bad trowels, and you have to suffer through those bad trowels to get the few good ones. Choosing a MARSHALLTOWN brick trowel means that you choose to get a great brick trowel every time, so there are no surprises.

PermaShape Flat

PermaShape®

Guarantees trowel will maintain original flat shape

Golden Stainless Steel Blade

Withstands pressure of hard troweling

- Guaranteed to stay flat use after use
- Made from highest grade stainless steel
- Properly shaped and tempered to a golden finish
- Withstands pressure of hard-troweling
- Flat blade makes applications easier with more consistent finish

MARSHALLTOWN knows that the blade will wear away. But assuming the blade is used to smooth cementitious material and is not harmed in any other way, MARSHALLTOWN also knows the blade will maintain its shape throughout its life.

GUARANTEED TO NEVER LOSE ITS SHAPE

PS PERMASHAPE® "FLAT" GOLDEN STAINLESS

- The MARSHALLTOWN PermaShape® Finishing Trowel guarantees that your trowel will maintain its shape while ensuring a professional quality finish to any EIFS project.
