SCRUFFS FOOTWEAR SIZE GUIDE (COMING SOON)

FIT TIPS

Not all brands of footwear fit the same. The standard size guide below is a good indicator of what size you should wear, but there may be slight variations in sizing between different brands. Most foot problems can be prevented by wearing properly fitting footwear. Don't assume that your footwear size remains the same. The shape of your feet changes as you get older. Have both feet measured regularly as most people have one foot larger than the other. Fit to the largest foot.

Always try footwear with your regular work socks. Make sure that they are laced properly. The ends of your toes should not touch the front part of the footwear. To double check the fit, untie the laces and slide your forefinger down the back of the footwear behind the heel. The ends of your toes should hit the front toe part of the footwear.

MEASUREMENT TIPS

The fit of workwear depends on the cut, fabric and styling of the garment. If you're not sure, follow our top tips on how to measure yourself. Then refer back to the detailed workwear size guide shown below so you know which size you should buy.

CHEST (A)

Measure around the fullest part of the chest. Place the measuring tape high up under your arms and make sure it's at the same height at the back across your shoulder blades.
