Grey Series

General characteristics

Motor

- Electrical submersible pumps in GJL-250 cast iron;
- Two silicon carbide (2SiC) mechanical seals in oil sump;
- Ecological dry motor with thermal protection;
- Sensor for detecting water in the mechanical seal oil sump;
- Self lubricated ball bearings

Hydraulic families

DG (Draga)

p. 9

- Set-back vortex impeller.
- Used with unstrained soiled biological wastewaters and sewage and for civil lifting applications. It is thus ideal for wastewater treatment plants, sewer systems, livestock farms, industry and agriculture.

DR (Dreno)

p. 21

- Multi-channel open impeller.
- Designed for mainly professional and industrial use such as wastewater treatment plants, sewage systems and livestock farms, it is particularly suitable for the treatment of liquids containing suspended solids or filaments, and low or medium density activated sludges.

GR (Grinder)

p. 47

- Impeller with grinder system.
- Designed for professional and industrial use, it is suitable for the treatment of liquids containing suspended solids or fibres, and low or medium density activated sludges.

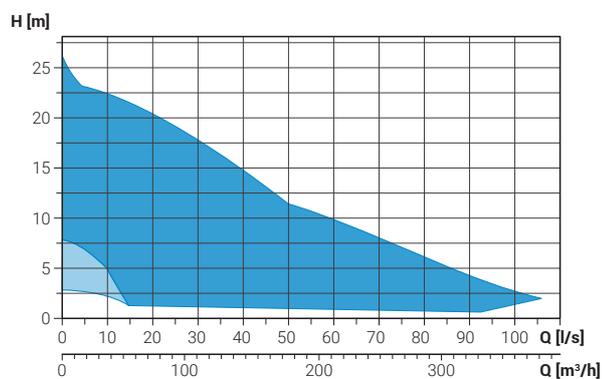

AP (Alta Prevalenza)

p. 51

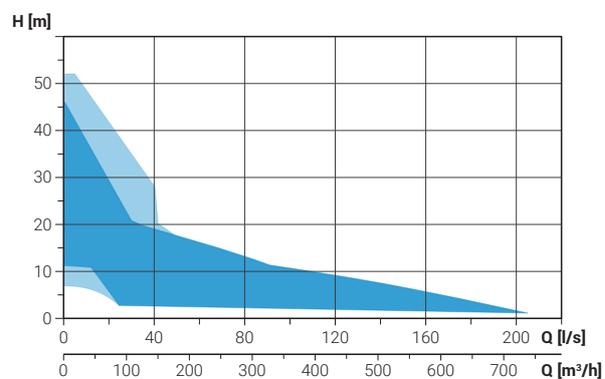

- High head impeller.
- Suitable for clear wastewater, rainwater and seepage. The considerable manometric head guarantees excellent results for the creation of water features and decorative fountains; suitable for use in agriculture, irrigation and the fish processing sector.

Versions available

Electrical variants

- NAE** No electric accessories
- TS** Thermal protection, sensor for detecting water in the mechanical seal oil sump

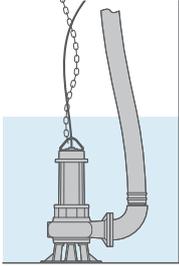

Cooling system

- N** No cooling and/or seal flushing system

Set of mechanical seals

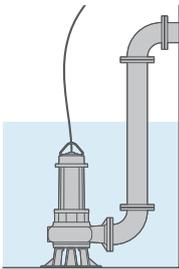

- 2SiC** 2 mechanical seals in silicon carbide

Installations

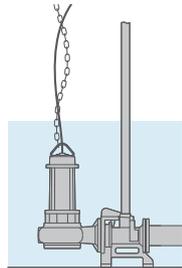

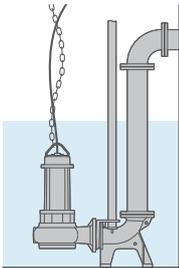

FREE installation

The electric pump, standing on its feet or base, is connected to the delivery flexible pipe using a joint fixed to the discharge. This installation allows to move easily the electrical pump.

FIXED installation

The electric pump, standing on its feet or base, is connected to the delivery pipe, which is screwed to the discharge if threaded, or fixed to a bend if the port is flanged. The pump-hose connection may be threaded or flanged, depending on the pump fitting.

Installation with BASE COUPLING FOOT

Available for electric pumps with threaded discharge.

The pump unit is supported by a special device fitted to the delivery pipe.

This device can be installed at any time without having to empty the tank. It simplifies any maintenance work on the pump, which can be lifted out and resubmerged with great ease.

It is recommended in particular for installations of small size, and does not require the pump to be resting on the bottom of the tank.

ATEX

Models available on request with **ATEX** certification, suitable for installation in the presence of potentially explosive gases and liquids.

CE marking of conformity according to the ATEX directive 2014/34/EU.

2460

Number of the notified body (marked on the plate) which has certified the quality system for ATEX.

The specific marking of explosion protection given in the Annex II of the Directive 2014/34/EU.

II

Group of the equipment. Group II: electrical equipment for use in places with an explosive gas atmosphere other than mines.

2G

Category of the equipment subject of certification, in presence of potentially explosive atmospheres of Gas, Vapors, Mist (G). The equipment can be installed in ZONE 1.

Ex db IIB

The type of electrical protection for the equipment is a flameproof enclosure, suitable for Gas Group IIB and IIA.

Ex h IIB

The type of mechanical protection for the equipment is through liquid immersion "k" and constructional safety "c", suitable for Gas Group IIB and IIA.

T4

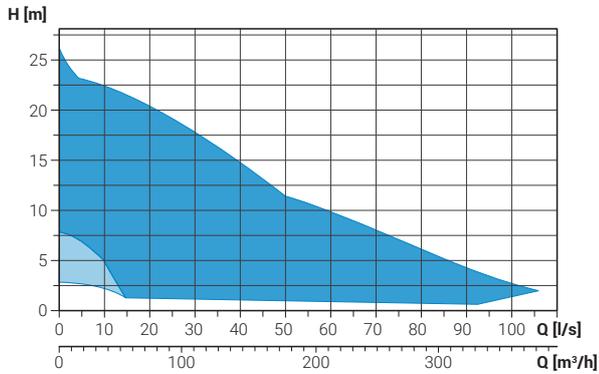

Temperature Class of the equipment (maximum surface temperature 135°C).

Gb

Equipment for explosive gas atmospheres, having a "high" level of protection, which is not a source of ignition in normal operation or during expected malfunctions.

Pumps with vortex impeller

Operating ranges

Range characteristics

| | |
|----------------------|---------------|
| Motor power | 1.1 ÷ 15.0 kW |
| Poles | 2 / 4 |
| Insulation class | H |
| Degree of protection | IP68 |
| Discharge vertical | G 2½" |
| Discharge horizontal | DN65 ÷ DN150 |
| Free passage | max 125 mm |
| Max flow rate | 106.0 l/s |
| Max head | 26.1 m |

Motor

Ecological dry motor with thermal protections.

Cable

S1RN8-F electric cable. Standard version 10 m cable length.

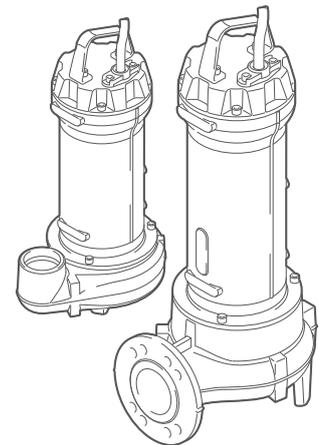

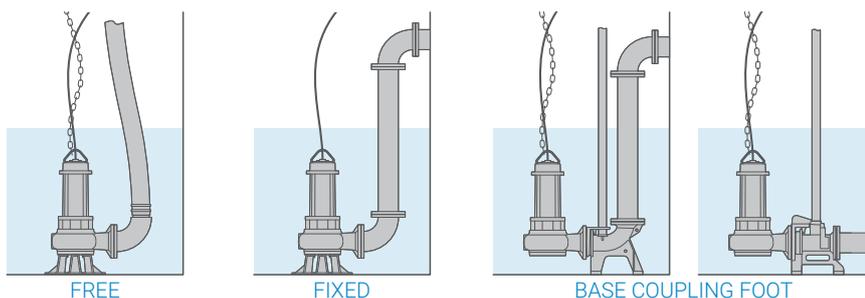

Mechanical seals

Two silicon carbide (SiC) mechanical seals in oil sump.

Applications

Used with unstrained soiled biological wastewaters and sewage and for civil lifting applications. It is thus ideal for wastewater treatment plants, sewer systems, livestock farms, industry and agriculture.

Dimensions in mm

Multi-channel open impeller

Operating ranges

Range characteristics

| | |
|----------------------|-----------------|
| Motor power | 1.8 ÷ 18.5 kW |
| Poles | 2 / 4 / 6 |
| Insulation class | H |
| Degree of protection | IP68 |
| Discharge vertical | G 2½" |
| Discharge horizontal | DN65 ÷ DN250 |
| Free passage | max 100 x 70 mm |
| Max flow rate | 205.0 l/s |
| Max head | 55.5 m |

Motor

Ecological dry motor with thermal protections.

Cable

S1RN8-F electric cable. Standard version 10 m cable length.

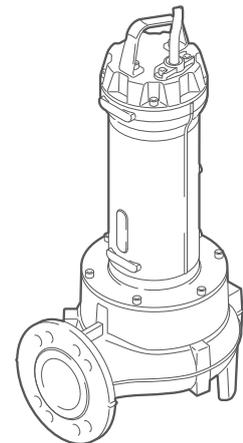

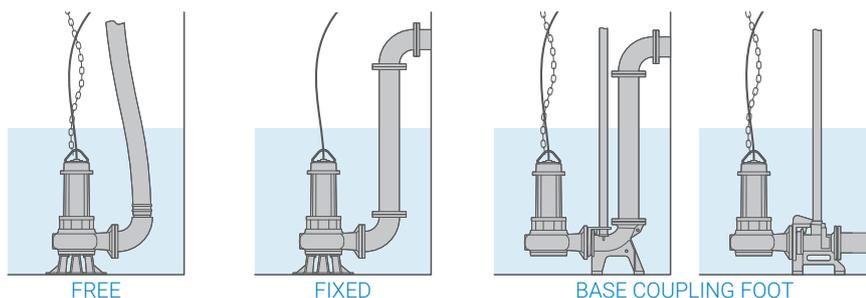

Mechanical seals

Two silicon carbide (SiC) mechanical seals in oil sump.

Applications

Applications
It is particularly suitable for the treatment of liquids containing suspended solids or filaments, and low or medium density activated sludges.

Installations

Versions

| | |
|---------------------|---------|
| Electrical variants | NAE, TS |
| Cooling system | N |
| Mechanical seals | 2SIC |

Operating specifications

| | |
|----------------------------|----------|
| Max operating temperature | 40 °C |
| PH of treated fluid | 6 ÷ 14 |
| Viscosity of treated fluid | 1 mm²/s |
| Maximum immersion depth | 20 m |
| Density of treated fluid | 1 Kg/dm³ |
| Acoustic pressure max | <70dB |
| Max starts per hour | 30 |

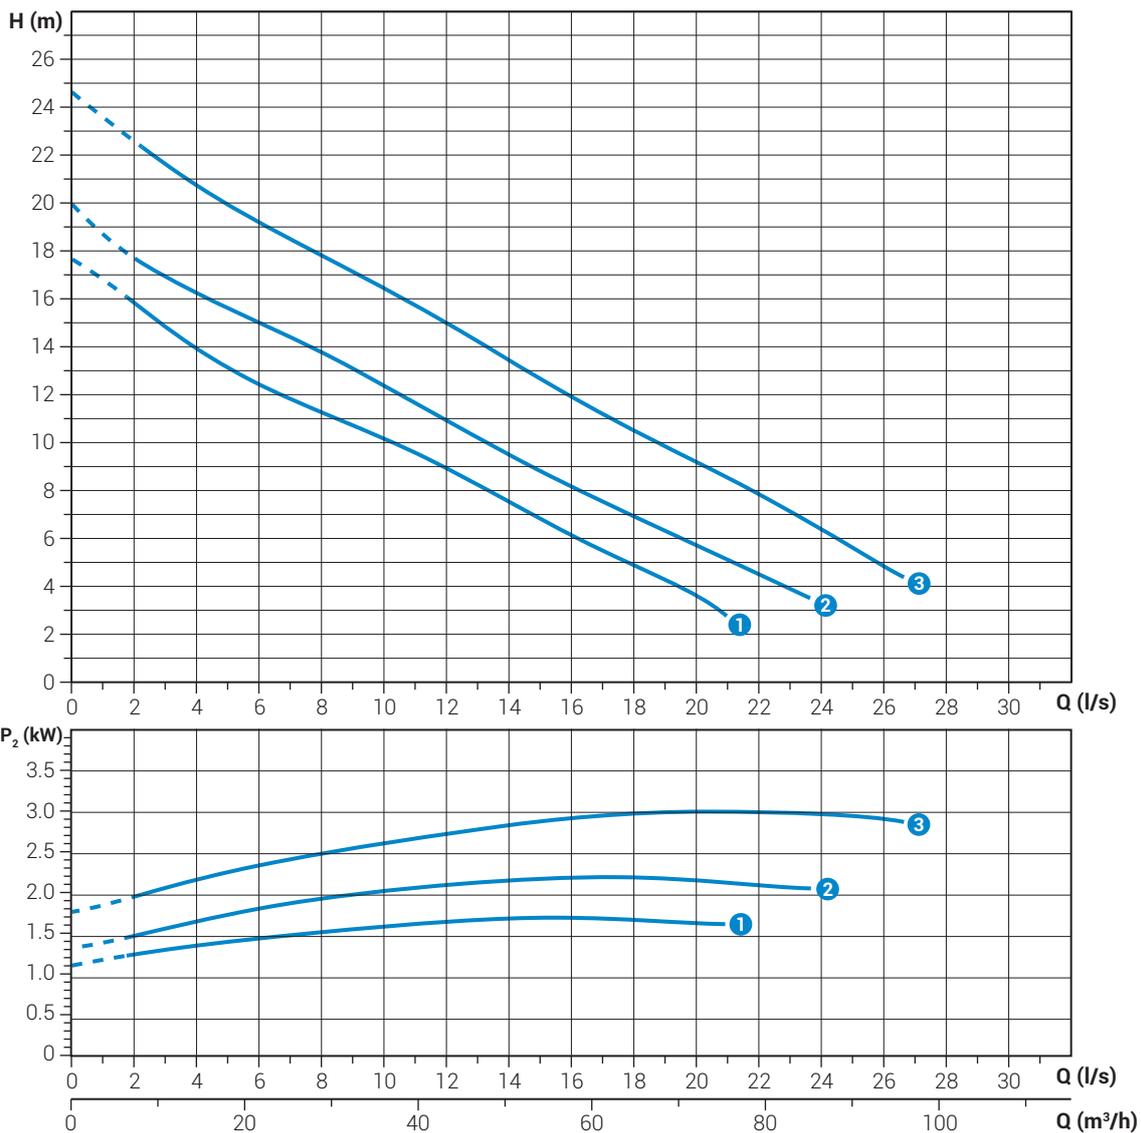

Construction materials

| | |
|-----------------|--|
| Case | Cast iron EN-GJL 250 |
| Hydraulic parts | Cast iron EN-GJL 250 |
| Impeller | Cast iron EN-GJL 250 |
| Nuts and bolts | Stainless steel - Class A2-70 |
| Standard gasket | Rubber - NBR |
| Shaft | Stainless steel - AISI 431 |
| Paint type | Ecological bicomponent epoxy (~200 µm) |
| Cutter | - |
| Strainer | - |

Dimensions in mm

Impeller with grinder system

Operating ranges

Range characteristics

| | |
|----------------------|------------------------|
| Motor power | 1.8 ÷ 7.5 kW |
| Poles | 2 |
| Insulation class | H |
| Degree of protection | IP68 |
| Discharge vertical | - |
| Discharge horizontal | G 1½" DN32 - G 2" DN32 |
| Free passage | - |
| Max flow rate | 8.4 l/s |
| Max head | 53.7 m |

Motor

Ecological dry motor with thermal protections.

Cable

S1RN8-F electric cable. Standard version 10 m cable length.

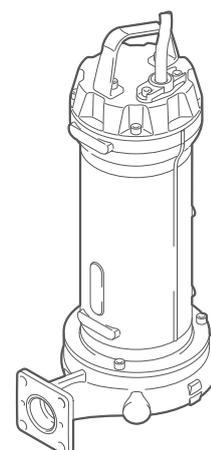

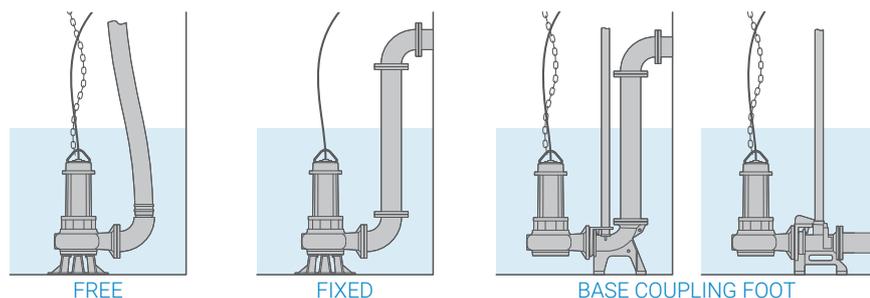

Mechanical seals

Two silicon carbide (SiC) mechanical seals in oil sump.

Applications

Designed for professional and industrial use, it is suitable for the treatment of liquids containing suspended solids or fibres.

Installations

Versions

| | |
|---------------------|---------|
| Electrical variants | NAE, TS |
| Cooling system | N |
| Mechanical seals | 2SIC |

Operating specifications

| | |
|----------------------------|----------|
| Max operating temperature | 40 °C |
| PH of treated fluid | 6 ÷ 14 |
| Viscosity of treated fluid | 1 mm²/s |
| Maximum immersion depth | 20 m |
| Density of treated fluid | 1 Kg/dm³ |
| Acoustic pressure max | <70dB |
| Max starts per hour | 30 |

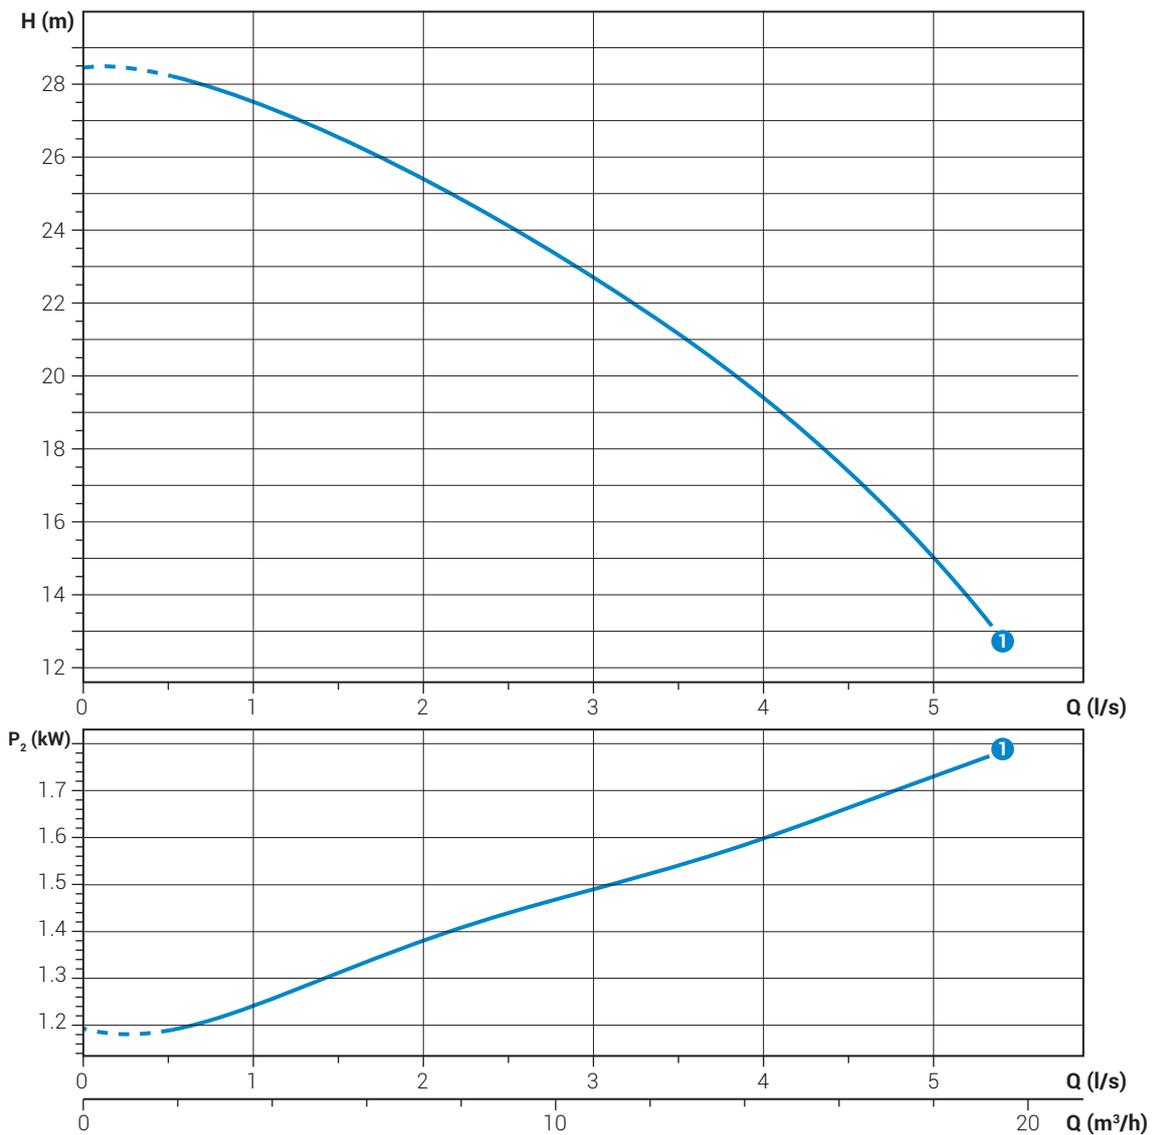

Construction materials

| | |
|-----------------|--|
| Case | Cast iron EN-GJL 250 |
| Hydraulic parts | Cast iron EN-GJL 250 |
| Impeller | Cast iron EN-GJL 250 |
| Nuts and bolts | Stainless steel - Class A2-70 |
| Standard gasket | Rubber - NBR |
| Shaft | Stainless steel - AISI 431 |
| Paint type | Ecological bicomponent epoxy (~200 µm) |
| Cutter | Chromium steel |
| Strainer | - |

Motor

Ecological dry motor with thermal protections.

Cable

S1RN8-F electric cable. Standard version 10 m cable length.

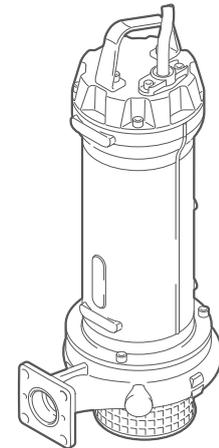

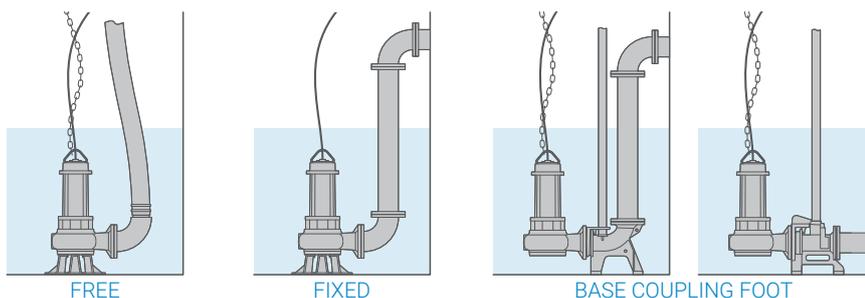

Mechanical seals

Two silicon carbide (SiC) mechanical seals in oil sump.

Applications

The considerable manometric head guarantees excellent results for the creation of water features and decorative fountains; suitable for use in agriculture, irrigation and the fish processing sector.
