NEW!

PS700R

(809480)

New polysteel torch – now has a powerful magnet in the handle and is rechargeable with two C.O.B. torches

COAST continues to innovate with its new Polysteel 700R, which is both rechargeable and features two chip-on-board lights in the handle, to make it both a handheld torch and a work torch.

The PS700R is waterproof, drop proof, and crush proof while possessing COAST's patented Pure Beam Optics System with twist focus to make the torch ultra durable and ready to weather any storm.

This torch is equipped with COAST's Dual Power™ technology, meaning the torch runs on either COAST's ZITHION™ rechargeable battery and also compatible with a CR123 disposable lithium battery (sold separately).

With a stainless steel core and a poly outer, the PS700R Torch is impact resistant, waterproof, and its LED is virtually unbreakable.
