

PRODUCT DATA SHEET

BAQ-PTG6R110 KIT • 810637

PRODUCT DETAILS

P3 Generic Maintenance Kit suits Puretec G6 & R11 UV Systems.

UV Maintenance Kits are an important part of maintaining the performance and longevity of UV water purification systems, helping to ensure clean and safe drinking water.

A UV Maintenance Kit usually includes replacement parts for the UV water purification system, such as quartz sleeves, UV lamps, o-rings, and other necessary components. These parts need to be regularly replaced to ensure that the UV water purification system functions properly and effectively.

UV Maintenance Kits are typically designed to maintain and optimize the performance of ultraviolet (UV) water purification systems. UV water purification systems are commonly used to eliminate harmful microorganisms and bacteria from water, making it safe for consumption.

It is important to follow the instructions when replacing the components of a UV water purification system. This will help to ensure that the system continues to operate at peak performance, effectively eliminating harmful microorganisms from the water.

BRAND

BIANCO
Aqua

INCLUSIONS

- 810979 – 5 Micron 10" BIG Pleated Cartridge
- 807322 – 10 Micron 10" BIG Carbon Block CTO
- 808952 – UV Lamp
- 808963 – Quartz Sleeve with o'rings

FEATURES

- Pleated design maximizes dirt-holding capacity.
- Ideal for pre-filtration in high sediment applications.
- Durable polyester media is bacteria and chemical resistant.
