WATER • TECHNOLOGY

ENERGY SAVING CONSTANT PRESSURE PUMP

The E.SYBOX and E.SYBOXMINI³ are completely new solutions in rainwater harvesting and cold water boosting for residential and light commercial applications.

They are an all in one pump and control solution comprising water cooled booster pump with integrated high efficiency variable speed motor.

The water cooled motor and sound dampening casing creates the quietest booster pumps available today.

The variable speed pump allows large power savings and a histogram on the pump display shows how much power has been saved when compared to a fixed speed pump.

Part Number	Item Code	Max Head (m)	Max Flow (l/m)

Rainwater Reuse

Garden Water

Sinks & Taps

Shower & Bathing

SAVE POWER | QUICK INSTALL
ULTRA COMPACT | ULTRA LOW NOISE

ITALIAN QUALITY & RELIABILITY FOR OVER 40 YEARS

Available until the 31st July 2019. Errors & Omissions Excluded. Prices shown are Promo Recommended Retail Price only with no obligation for our distributors to comply. Elements such as freight, installation & other additional costs for your specific needs should be discussed with your local store/distributor.

e.sybox

FLEXIBLE INSTALLATION

Horizontal or vertical, E.sybox can be installed virtually anywhere inside the home

OPTIMAL ENERGY USE

Inverter technology allows the E.sybox & Mini³ to find the best operating point of the pump, saving energy and money

EASY TO READ DISPLAY

A 70 X 40mm LCD display allows for the easy customisation of settings

IMPROVED MOTOR FUNCTION

Now water cooled, the motor is even quieter with the elimination of traditional cooling fans

SOUND PROOF ENCLOSURE

ABS material soundproofs the pump and protects it from the elements

NON-RETURN VALVE AT THE DELIVERY

Used in both horizontal and vertical installations, it is easily removed to support easy maintenance

COMPACT INTERNAL HYDRAULIC CONNECTIONS

A clever design that allows for simple and easy pump maintenance

EXPANSION VESSEL

A 2L capacity (E.sybox) & 1L capacity (Mini³) vessel that is guaranteed for 5 years & drinking water certified

EASY ACCESS TO MAINTENANCE POINTS

Remove the enclosure door to access air vessel loading and non-return valves easily

ANTI-VIBRATION FEET

Moulded to absorb vibration and noise from the e.sybox & Mini³, making them quieter than ever

FLOW AND PRESSURE SENSORS

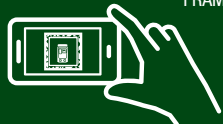

Seamlessly integrated electronic pressure and transducer & flow sensor at the delivery

EXTERNAL CONNECTIONS

Select optimised system inlets and outlets based on the installation

E.SYBOX PUMP

An energy saving integrated system for water pressure boosting in large domestic applications.

DAB-ESYBOX (800621)

- Reduces Energy
- Quick Install
- Ultra Compact
- Ultra Low Noise
- Max Head 61m
- Max Flow 120l/m

~~WAS \$2387~~
\$1599
SAVE \$788

ELECTRONIC PRESSURE SYSTEM

Ideal domestic pump for medium to large homes. Compact design for high efficiency. Designed specifically for quiet operation.

DAB-EUROINOX40/80MPCI (804788)

- Max Head 59m
- Max Flow 120 l/m

~~WAS \$1352~~
\$999
SAVE \$353

ELECTRONIC PRESSURE SYSTEM

Designed for domestic and urban household pressure systems.

Designed specifically for rainwater tanks, shallow well, spear and bore holes to a maximum depth of 9 metres.

Ideal for drip irrigation and garden watering.

DAB-132MP-AWB18V (600166)

- Max Head 48m
- Max Flow 80 l/m

~~WAS \$1067~~
\$849
SAVE \$218

ELECTRONIC PRESSURE SYSTEM

Ideal for above ground water tanks and is suitable for potable clean water and domestic applications.

DAB-JINOX102MPCI (804775)

- Max Head 53.8m
- Max Flow 60 l/m

~~WAS \$889~~
\$699
SAVE \$190

Part Number	Item Code	Max Head (m)	Max Flow (l/m)	Price
DAB-JETCOM62MPCX	806061	42	45	\$499
DAB-JETCOM132MPCX	806064	48	80	\$649

SOLAR ALSO AVAILABLE

KEY POINTS

- 4" inch diameter pumps available to suit the majority of bore sizes
- Flows from 25 litres / min up to a massive 450 litres / min
- DAB Borehole pumps have technopolymer impellers and unique abrasion rings to tolerate sand up to 120g/1000 litres of water - the most powerful in its class!
- Single phase, three phase and now solar motors available
- Oil filled motor options are now available
- DAB/Tesla motor is VFD control ready for the ultimate pumping efficiency.

Part Number	Item Code	What's Included	Sand resistant (gr/m ³)	Max Head (m)	Max Flow (l/m)	Price

DAB-S4F7MOL-P	806139		300	40.5	450	\$1889

BONUS

IPROTECT PUMP PROTECTION CONTROLLER

Valued at \$478

KEY POINTS

- A professional quality pump
- Micro casted stainless steel structural parts , supporting higher performance, higher power and higher torque when in use
- Proven techno polymer floating stack design- reduced wear, binding and easier starts in heavy sand applications guaranteed capability up to 120g/m³
- Integrated non - return valve in discharge for stable system operation

With over 2 million units produced every year, DAB's electronic pumps are synonymous with technology and reliability.

Thanks to a merger with TESLA, a leading Italian manufacturer of submersible borehole motors, DAB is now a world leader in the manufacturer of submersible borehole motors with more than 200,000 units produced annually from the factory in Italy.

When combined with the pump production by DAB of a wide range of submersible borehole pumps from 3" to 12", DAB are able to provide specific solutions for every kind of application, from small domestic irrigation to the most demanding industrial applications and municipal water supply.

The range of TESLA motors, **designed and manufactured in Italy** with ISO 9001 certified processes, is capable of satisfying a wide range of needs and includes water encapsulated motors (4" and 6"), water cooled rewindable motors (up to 14") and oil filled rewindable (4").

The range has now been further extended with the addition of a 4" DC / AC powered motor allowing for input power from Solar, Mains or Generator energy sources giving complete flexibility on and off the grid.

PUMP & PRESSURE TANK

Designed for pumping from tanks, rivers and dams.

DAB RAINSAVER SYSTEMS

DAB DIVERTRON1200 PUMP

The pump is a light and compact high head submersible clean water automatic pressure system pump supplied wired and ready to install.

The pump includes an electronic automatic restart pump control with dry run protection.

The pump is characterised by:

- Corrosion resistant pump components
- Fully automatic operation
- Shaft seal with sand protection boot
- 240V single phase motor with in-built auto reset thermal overload
- 15m of power cable

Rainsaver MK6

- Max water temperature (mains + pump): 40°C
- Max recommended cont. pump flow: 120 l/m
- Max recommended pump pressure: 1000 kPa
- Max recommended mains inlet pressure: 1000 kPa
- No need for float switch.

Rainsaver MK4E

- Max water temperature (mains + pump): 40°C
- Max recommended cont. pump flow: 100 l/m
- Max recommended pump pressure: 800 kPa
- Max recommended mains inlet pressure: 800 kPa
- Low voltage float switch output 12V
- Low voltage float switch cable 10 metres
- Power supply lead 2 metres
- Allows full mains flow and pressure

CAST IRON PRESSURE SYSTEMS

The automatic electronic pump control fitted and wired, starts and stops the pump automatically when a tap is turned on or off.

Automatic electronic pump control provides constant pressure at low to full flows and provides dry run protection. The auto restart function will restart normal operation when water is restored.

Automatic control incorporates electrical surge protection, rotatable pump connection and in-built check valve. Corrosion resistant pump body and impeller. FERRO60 also features a corrosion resistant Venturi and diffuser. Mechanical shaft seal. 240V single phase TEFC motor with in-built auto-reset thermal overload.

Available From Your Local Pump Supplier:

BEST IN CLASS ENGINEERING

Available until the 31st July 2019. Errors & Omissions Excluded. Prices shown are Promo Recommended Retail Price only with no obligation for our distributors to comply. Elements such as freight, installation & other additional costs for your specific needs should be discussed with your local store/distributor.

WHAT IS BEST IN CLASS ENGINEERING?

INNOVATION

- Bianco Pumpz' innovative technology, known as iCON, spans beyond pumps and is now featured across our iCON Controls, iCON Drives, iCON Pumps, iCON iPRESS and iCON Tanks product ranges.
- Integrated pump and control solutions coupled with natural renewable energy sources

QUALITY

- With an innovative focus on end-user solutions, the Bianco Pumpz product range has evolved over the years to epitomise 'best in class engineering'.
- Every shipment checked and inspected according to our requirements
- Partnering with specialists in China to ensure the products land here with the best quality available

ENGINEERING & DESIGN

- Unique designs with all tooling owned by White International
- New design terminal box - for better weather protection
- NSK bearings and high quality NSF approved seals
- Stainless steel shafts

PERFORMANCE & RELIABILITY

- Wet end preassembly cleaning and treatments
- Quality assembly and stringent quality control process
- Series 2 product uses best practice motor designs
- Improved hydraulic design

DRAINAGE & CENTRIFUGAL

LIGHT CONSTRUCTION PUMPS

Designed for dewatering of construction sites and pits. General dewatering where there is abrasive material. Suitable for construction sites, stormwater and basements.

BIANCO RAINSAVER SYSTEMS

The RAINSAVER Rain Harvesting System is an evolutionary change in our range of Bianco Rainsaver devices that switches seamlessly between tank water and the mains supply. Not only does it conserve water, it's easy to install.

The Bianco Rainsaver Rain Harvesting Systems are Australian owned and designed so you know it's ideal for Australian home owners.
